PROFILE SUMMARY

I don't just write code, I build systems that scale, ship, and solve real problems. Technical Head with end-to-end experience in web platforms, AI/ML, and Cloud Computing & Virtualization including a Docker /Kubernetes based Virtual RAM platform with sub-250ms latency. Skilled in Python, AWS, and full-stack development, with proven leadership delivering cloud-based systems for real-world, client-facing projects.

EXPERIENCE

Technical Head — Rajsanyog

06/2025 – Present | Nagpur

- Lead end-to-end web portal development and digital consulting for political campaigns and organizational clients, owning delivery from architecture to deployment.
- Design and implement AI agents and automated tech solutions, building scalable platforms and custom digital tools used in live campaigns.
- Deliver startup-focused technology solutions, translating client requirements into scalable products and custom digital tools.

AI-ML Virtual Internship — AICTE, India

05/2025 – 08/2025 | Remote

- Completed structured training in cloud-based data handling and end-to-end pipeline development.
- Applied data modelling and database management concepts to real-world datasets.
- Used industry-standard tools for data cleaning, transformation, and visualization.

Data Engineering Virtual Internship — AICTE, India

07/2024 – 09/2024 | Remote

- Gained hands-on experience with Python AI frameworks for algorithm implementation.
- Integrated data analysis and predictive modelling techniques into project workflows.
- Learned deployment and optimization of AI models in real-world systems.

EDUCATION

- **Bachelor of Technology - Information Technology** 2023 – 2027
Shri Ramdeobaba College of Engineering and Management | **CGPA - 7.5**
- **HSC** 2011 – 2020
Kendriya Vidyalaya VSN | Nagpur, CBSE | **89%**
- **SSC** 2021 – 2023
Kendriya Vidyalaya VSN | Nagpur, CBSE | **75%**

TECHNICAL SKILLS

- **Programming & Data:** Python, SQL, Data Analysis (Power BI, Tableau)
- **Cloud & AI:** AWS, AI Automation, Machine Learning , Deep Learning (ResNet50, OpenCV)
- **Web Development:** Node.js, Web Portal Development
- **Soft Skills:** Adaptability, Decision-Making, Rhetorical Communication Skills, Networking

PROJECTS

VRAMP - Virtual RAM Management Platform

02/2026 – Present

- Developed a cloud-based virtual RAM system to extend smartphone memory and improve performance.
- Implemented compression and edge serialization enabling 10x connectivity with low latency.
- Improved device performance, reducing app crashes and enabling smoother gaming without hardware upgrades.

Animal Diseases Detection System

07/2025 – 11/2025

- Built a deep-learning model (ResNet50) to detect animal diseases from microscopic images.
- Developed an end-to-end pipeline with OpenCV preprocessing for fast, accurate prediction.
- Generated automated reports covering disease name, symptoms, and treatment suggestions.
- Created a simple web interface enabling fast veterinary diagnosis for end users.

CERTIFICATIONS

- **AWS** — Data Engineering: Hands-on coursework across core AWS Data Engineering and Cloud Practitioner services.
- **Google Data Analytics Professional Certificate** (Coursera): SQL, spreadsheets, Tableau, and R for data-driven decisions.
- **Programming in Python** (Coursera): Python for data processing, automation, and application development.
- **Software Engineering Job Simulation** (By Forage - JPMorgan Chase & Co.): Real-time market data processing, interactive dashboards, and an open-source contribution.
